

Jigsaw Passion is happy to bring you the world of customized jigsaw puzzles with novel concepts!

Sizes & Complexities: As per your needs & within the limitations of the photo
Material: Acrylic (MDF also possible)

Contact: Siddharth Joshi, Anjor Services on +91-8830615965/ anjorservices2192@gmail.com

Personalized Jigsaws

- **You may mail us photo of your cherished memory or the ‘photographic memory’ that may be valuable to someone whom you wish to give a unique gift. (Needless to say, your photo is your property and won’t be used otherwise).**
- **We will make a jigsaw out of that as per the complexity desired by you (within the limitations of the photograph)... cost effectively!**
- **We have delivered 200+ customized jigsaws in the last 2 years with pieces ranging from 20 to 500 and overall dimensions ranging from 4 to 40 inches.**
- **We have also developed highly tailor-made jigsaws for large functions & conferences as also for educational purposes.**

Jigsaws with Indian Themes

- **We have our own collection of jigsaws from which you can choose. We keep on adding to them.**
- **All our jigsaws are Indian themes- places, culture, traditions, personalities that we all can relate to.**
- **Please ask us for the links to some of the photos from which we have created jigsaws if you wish to purchase our standard offerings.**

Jigsaw Library/ Jigsaws on Hire

- **What to do with the jigsaw puzzles when you have assembled them once, twice, thrice...? We have a very unique concept of Jigsaw Library. Just like a book library, you take a jigsaw home and then exchange it for another one next time! We have members ranging from 4 to 74 years in age. We will bring the puzzles to your society if we can get 10 members there.**
- **We also have large jigsaw puzzles (500 to 5000 pieces) that have been manufactured by global brands and which we have painstakingly assembled and beautifully framed. You can hire them as a decorative hanging in your home or office and we will exchange them for another one on say monthly basis. We will send you link of the photos of these framed jigsaws, if you are interested.**

A Bit About Jigsaw Puzzles

Jigsaw puzzles require assembly of oddly shaped interlocking pieces. Each piece has a small part of a picture on it and when all the pieces are properly (and patiently!) positioned it produces a complete picture.

Jigsaw puzzles are fun games that can be enjoyed by 'children of all ages' solo or in groups. Other than the jigsaw pieces and the picture to be recreated using those pieces, they only need loads of patience and some strain on brain for the logic and imagination required to complete the jigsaw puzzle.

Jigsaw puzzles are also proven development tools. Physical skills required such as eye-hand coordination, cognitive skills needed such as problem solving and essential emotional skills such as focus on the task at hand imply that not only you have a good time completing the puzzle but improve some skills in the process. These puzzles can even help address conditions ranging from ADHD in kids to Alzheimer's in seniors.

There are many electronic versions of jigsaw puzzles but nothing beats the physical feel!

THANK YOU!

WE LOOK FORWARD TO HEAR FROM YOU!!
